

Common Layout Mistakes & *how to fix them*

#1: Stripy Layouts

**The 3 most
common mistakes:**

The 3 most common mistakes:

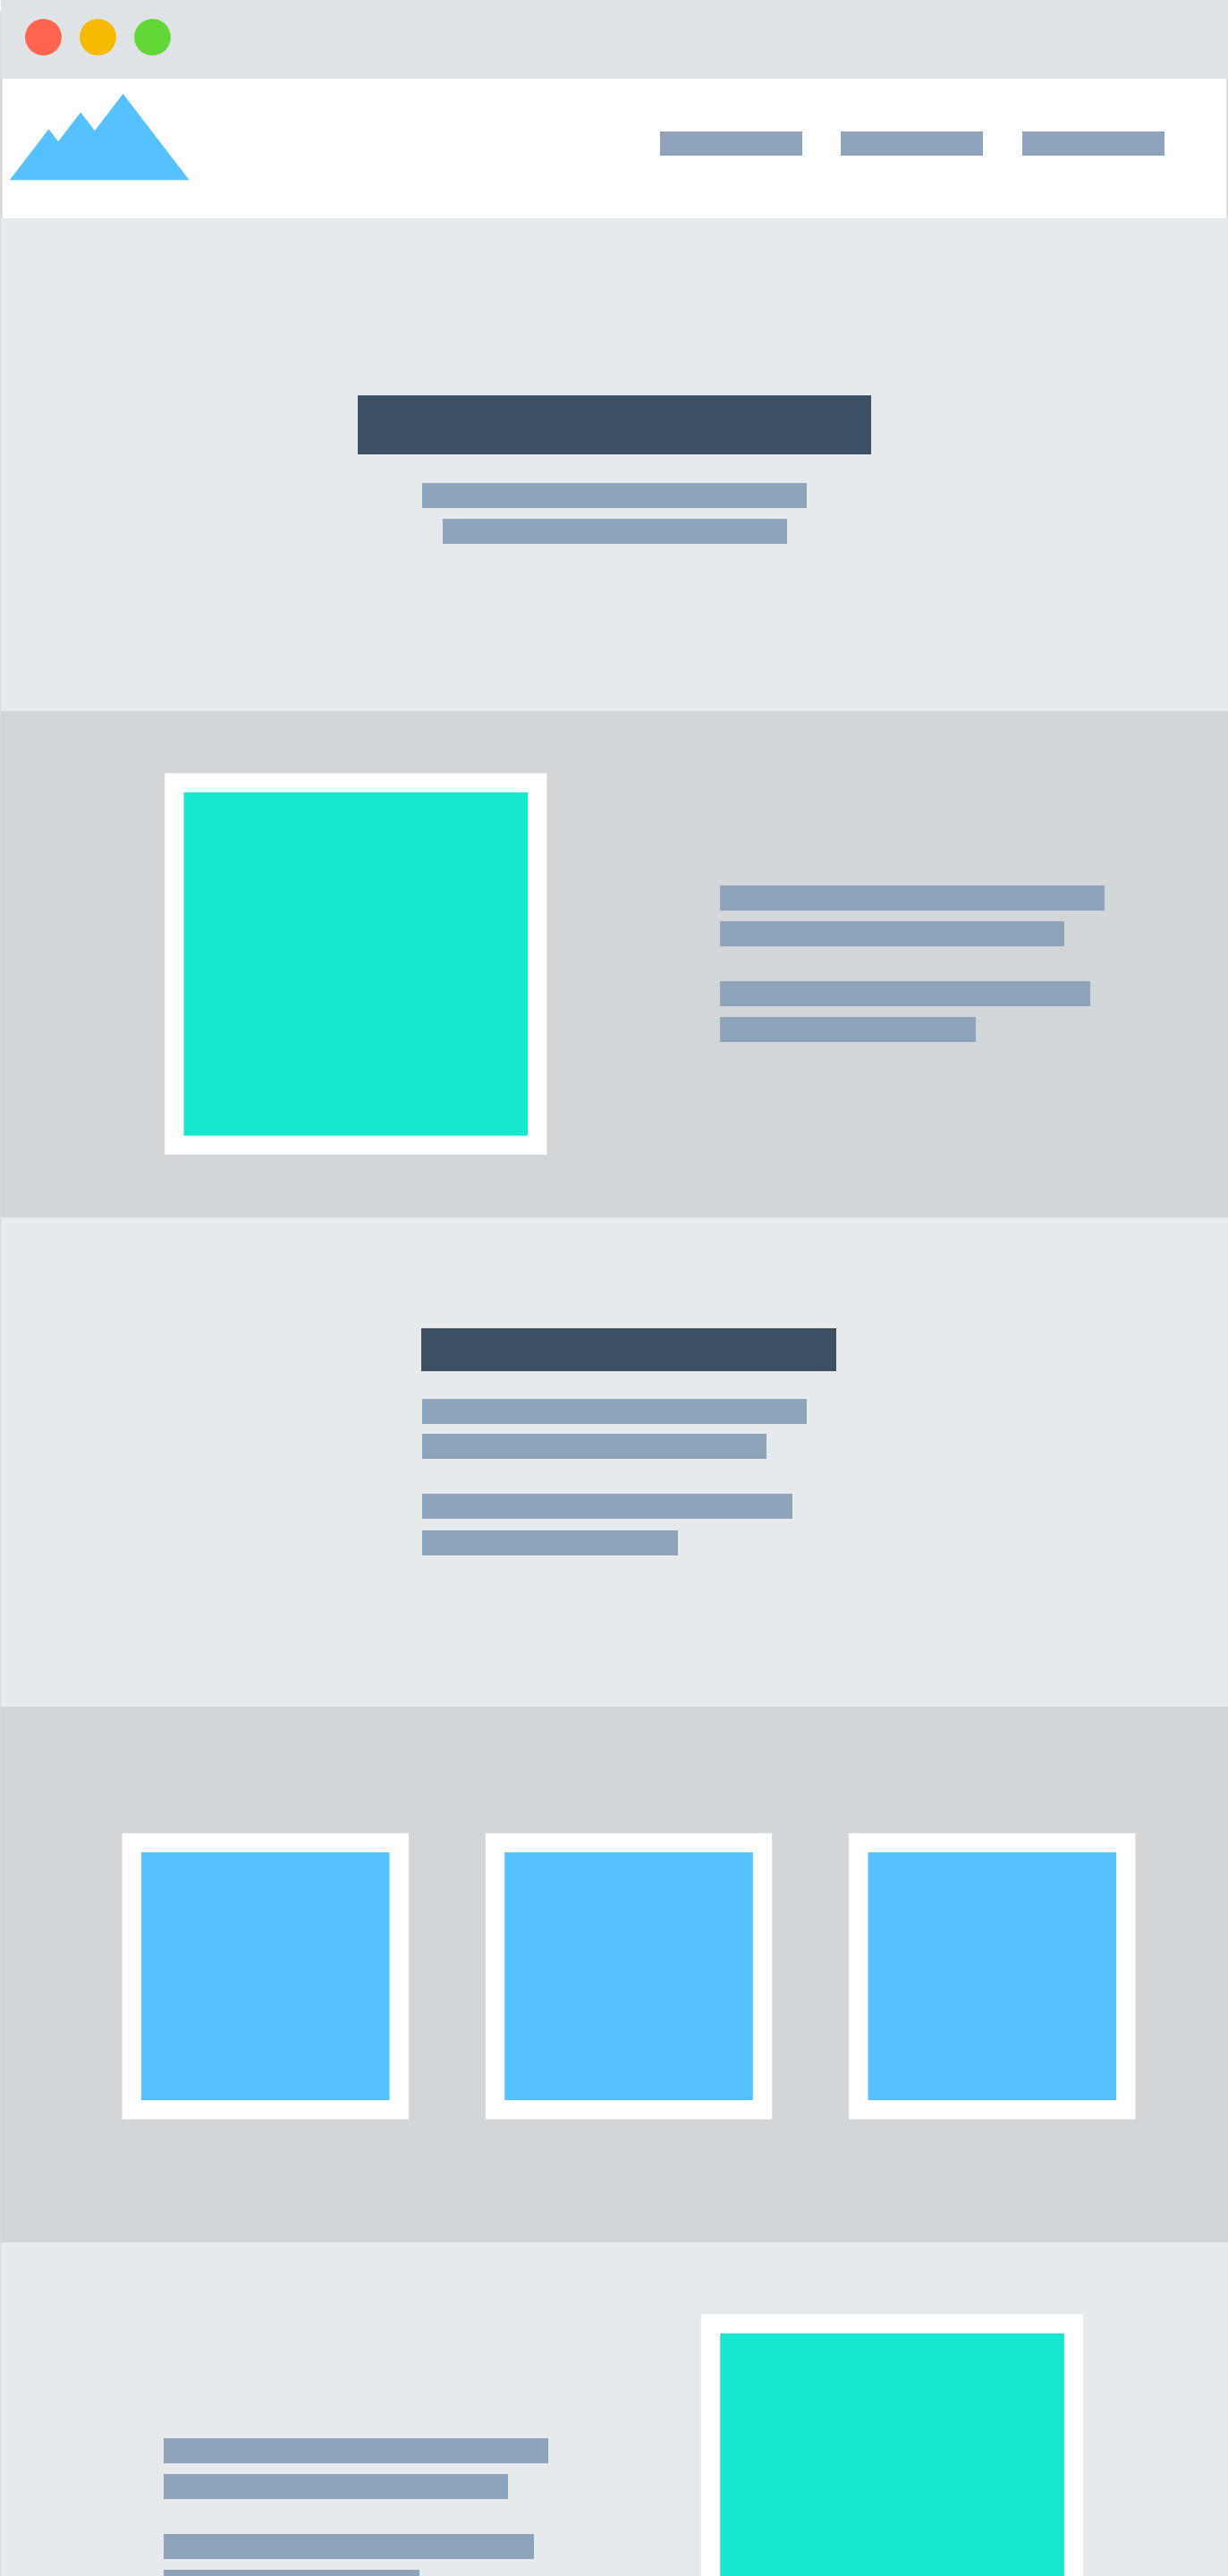

- Stripy syndrome

The 3 most common mistakes:

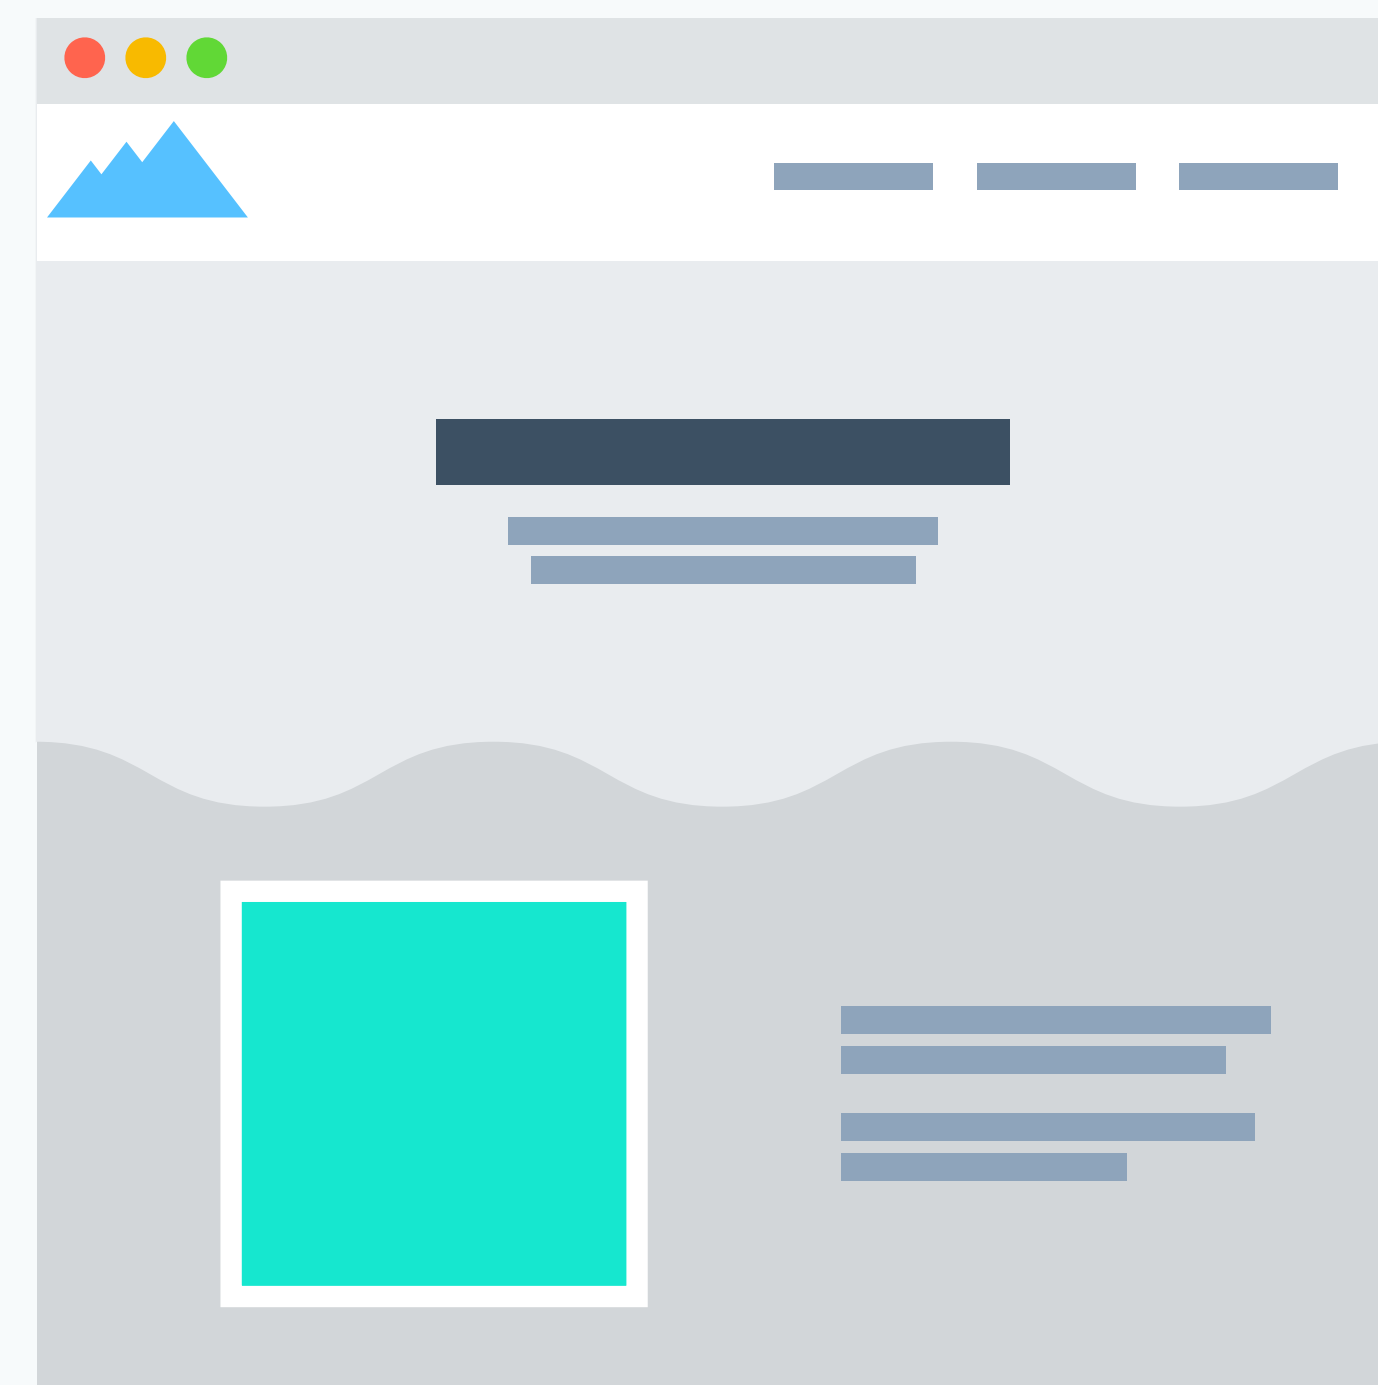

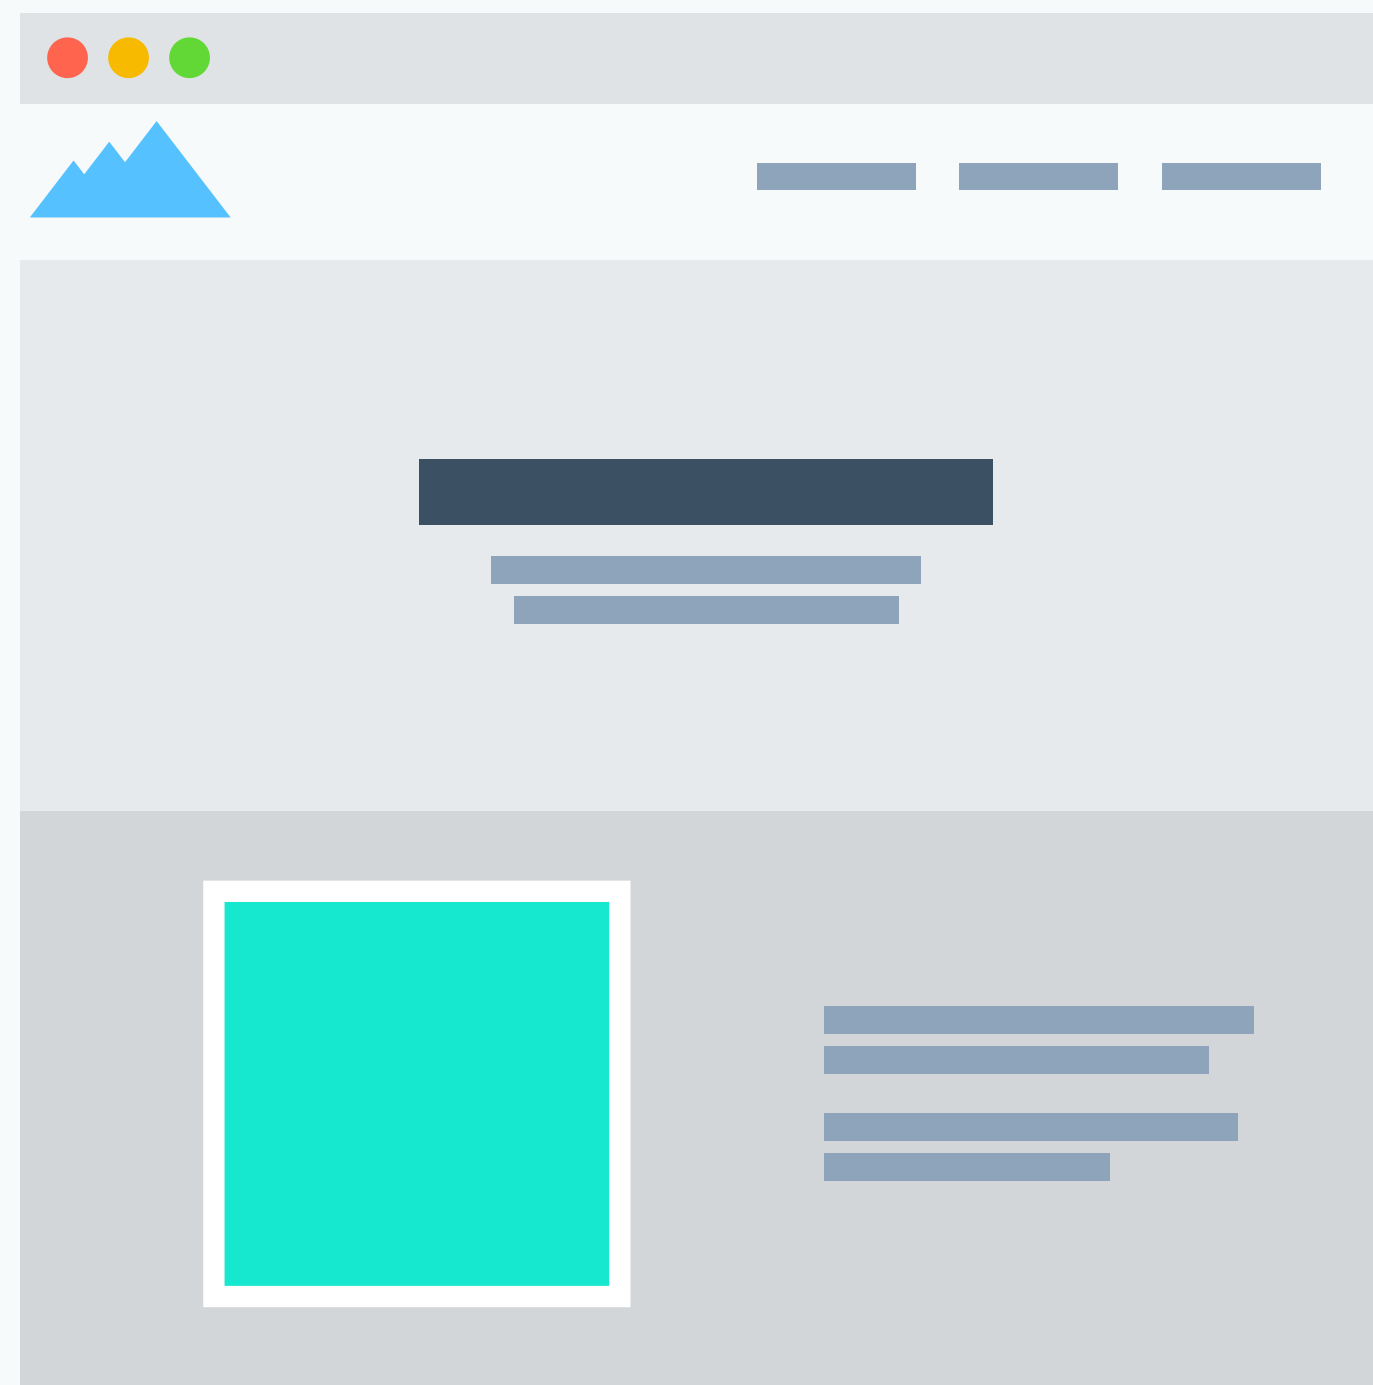

- Stripy syndrome
- Using centered text incorrectly

The 3 most common mistakes:

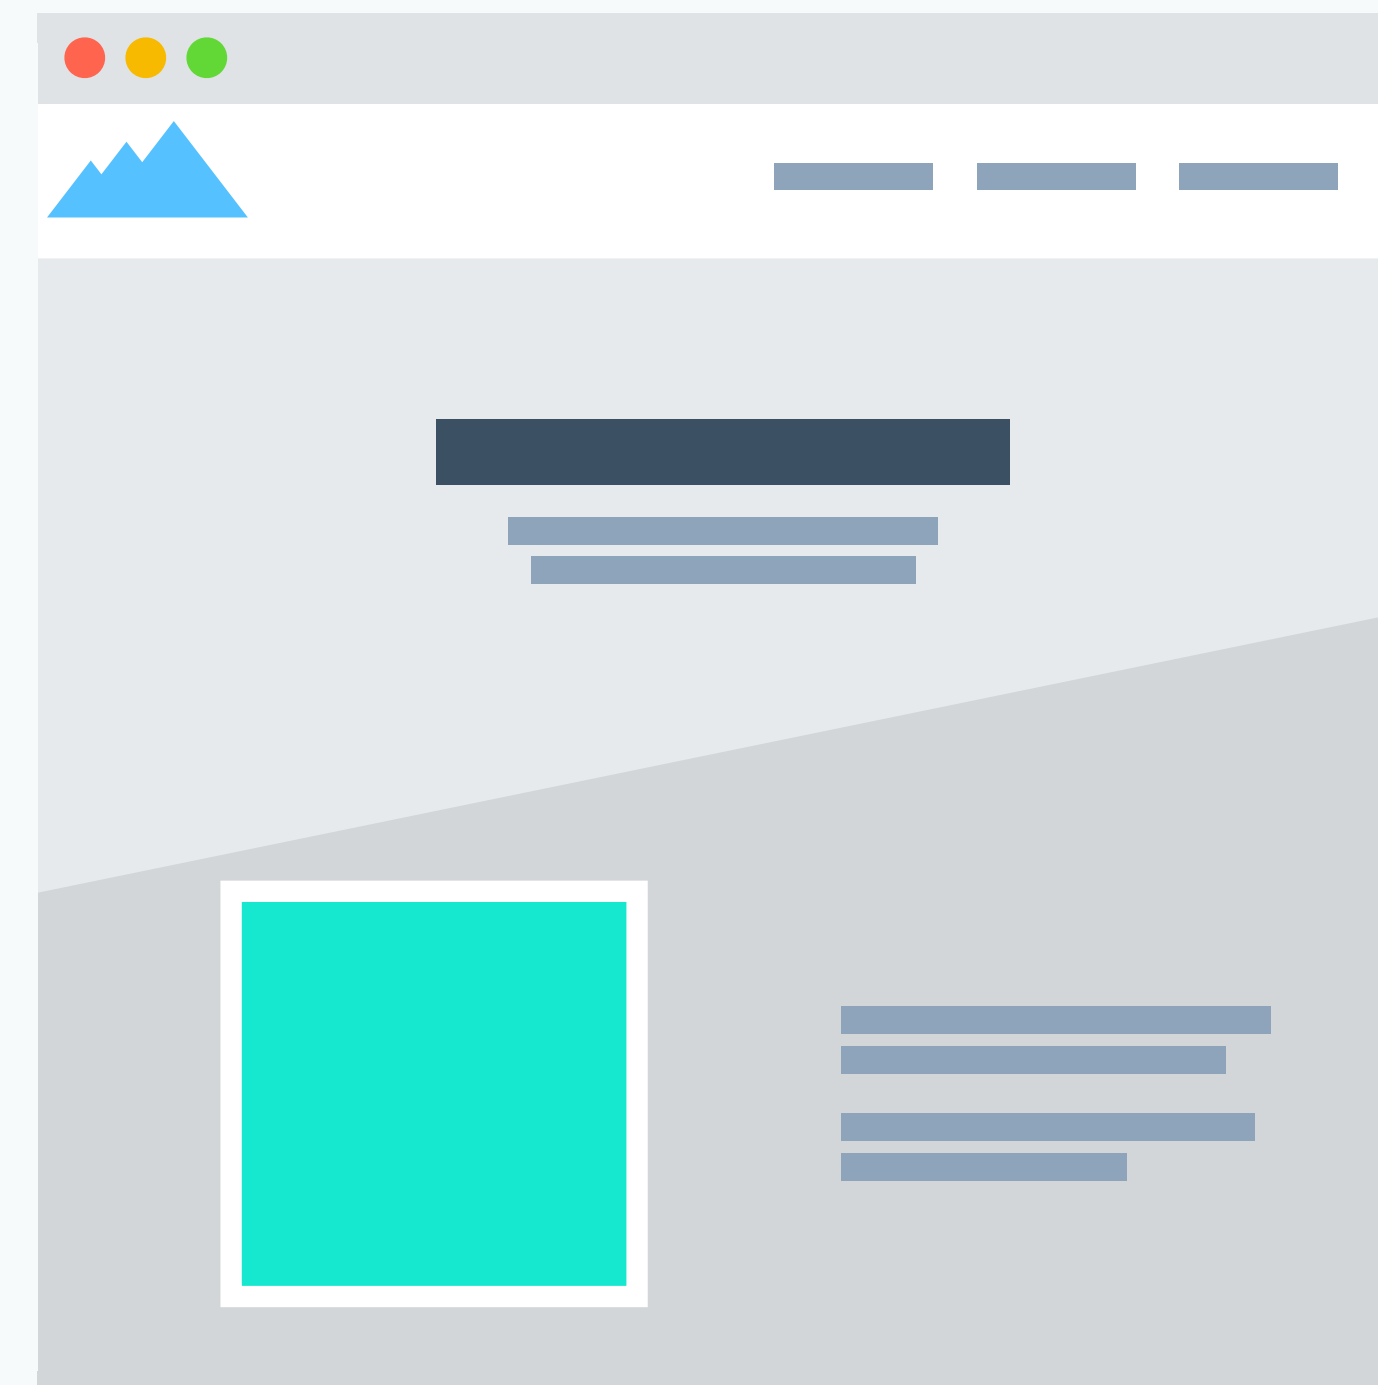

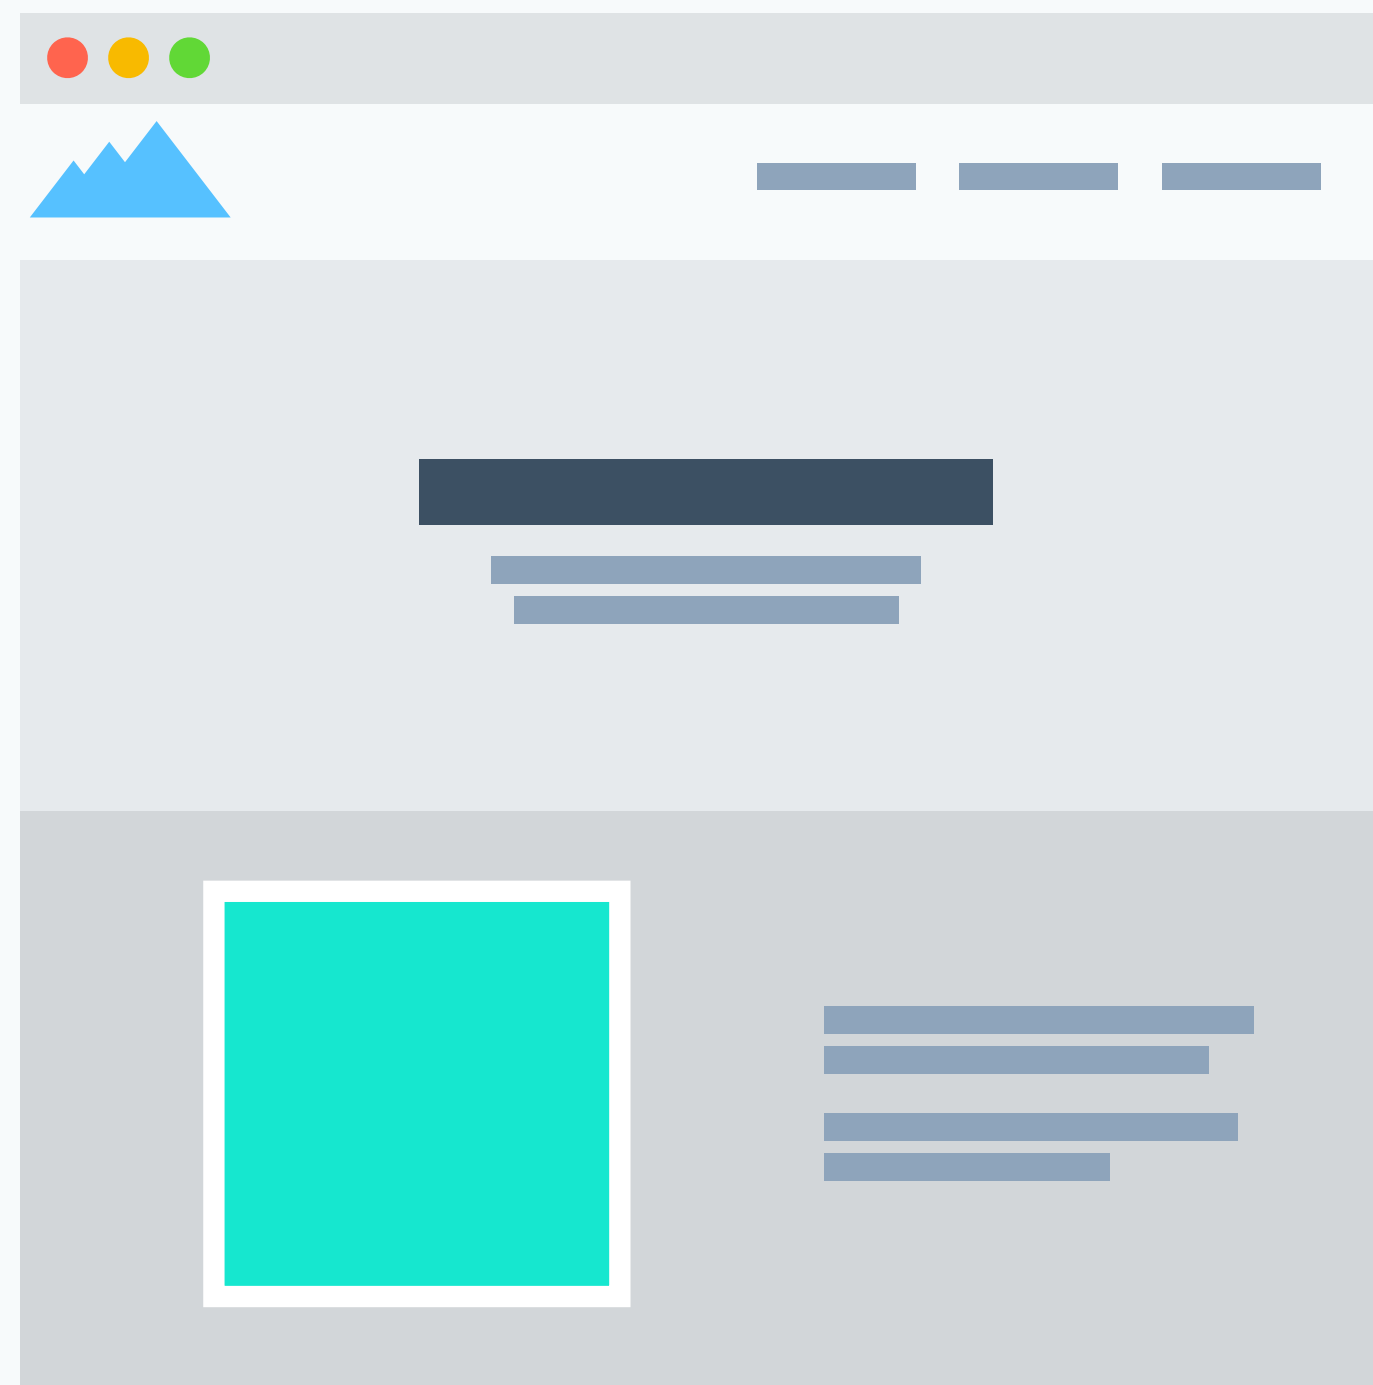

- Stripy syndrome
- Using centered text incorrectly
- Elements being out of alignment

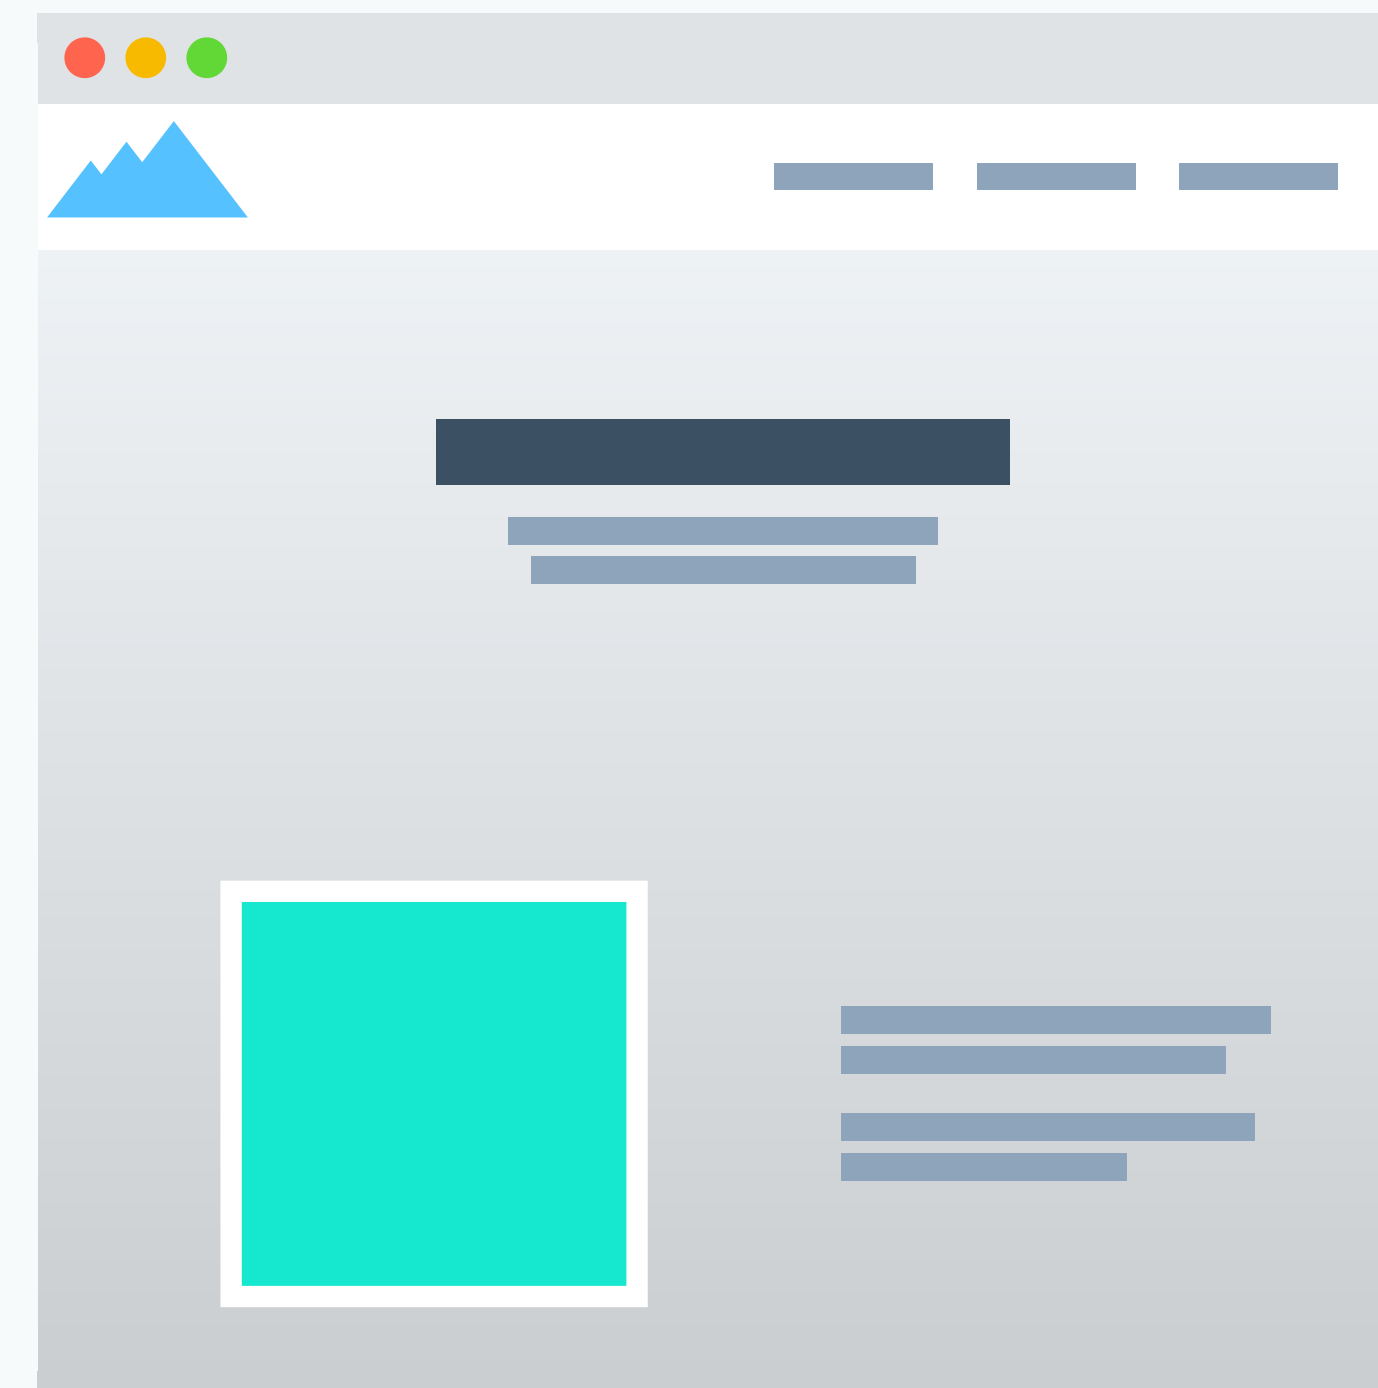

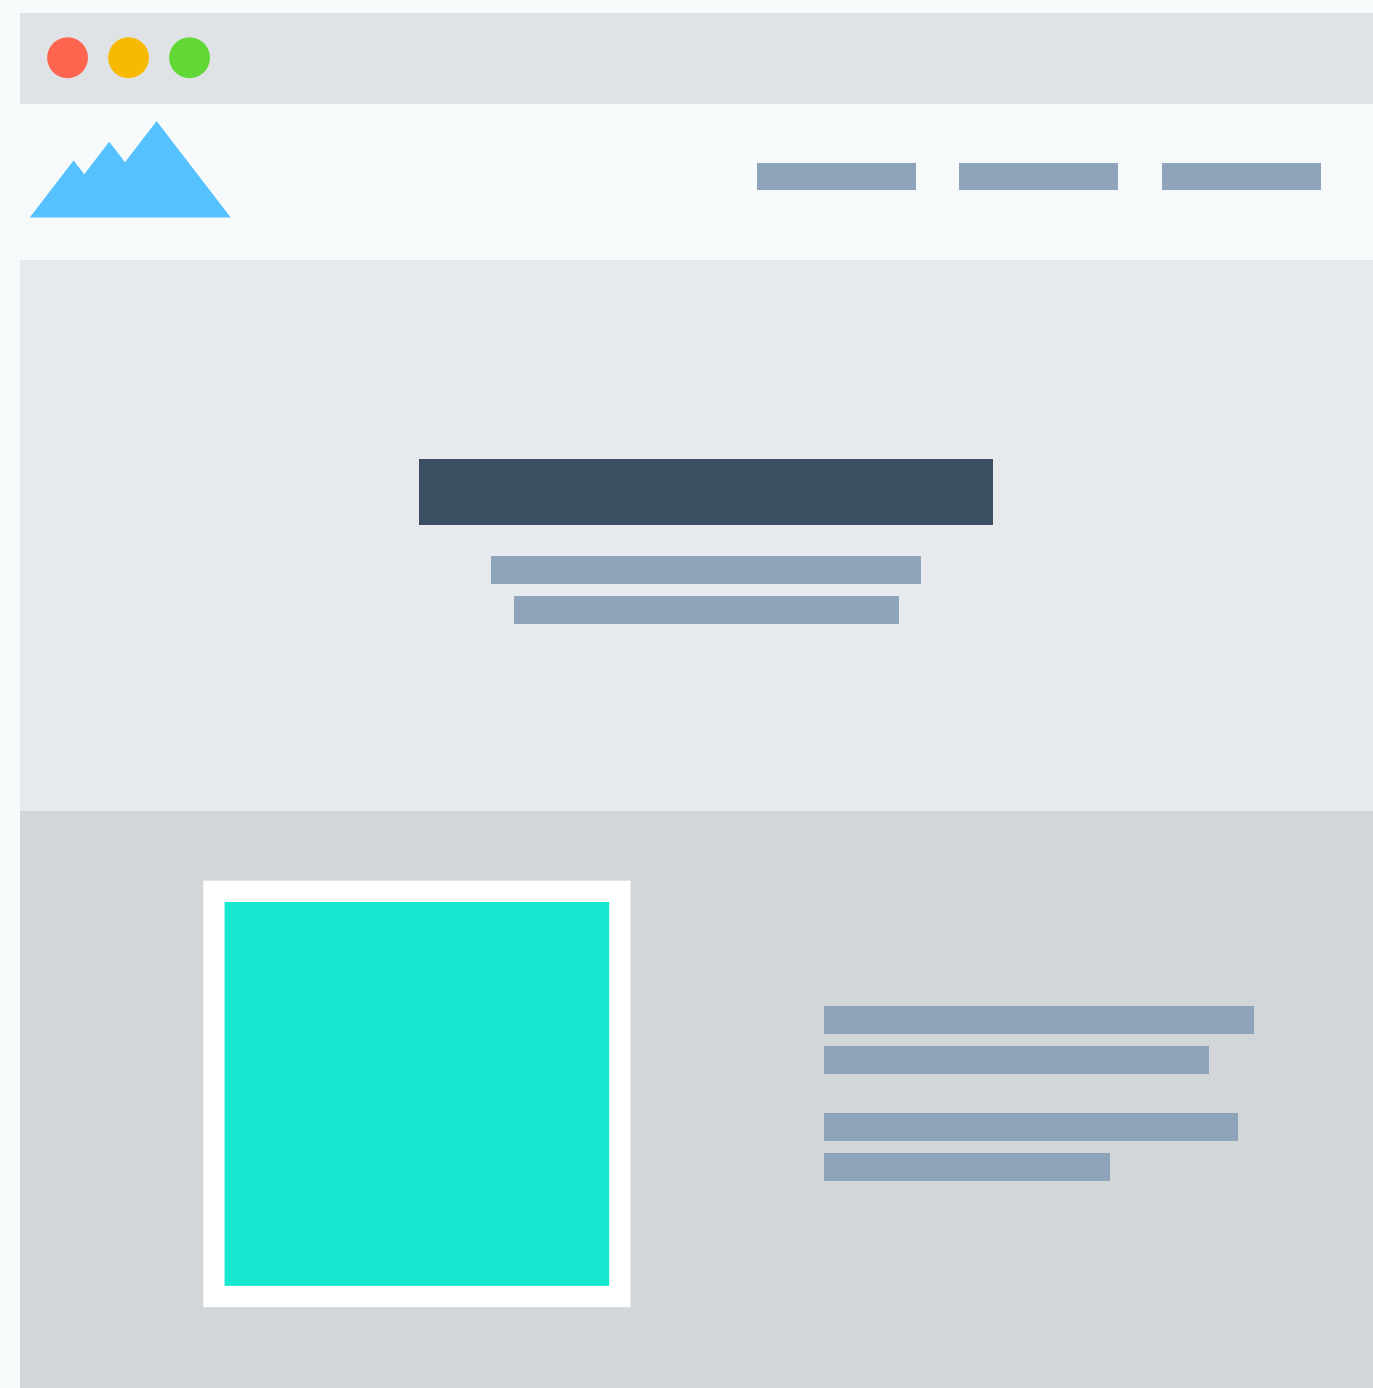

Use non-straight edge borders

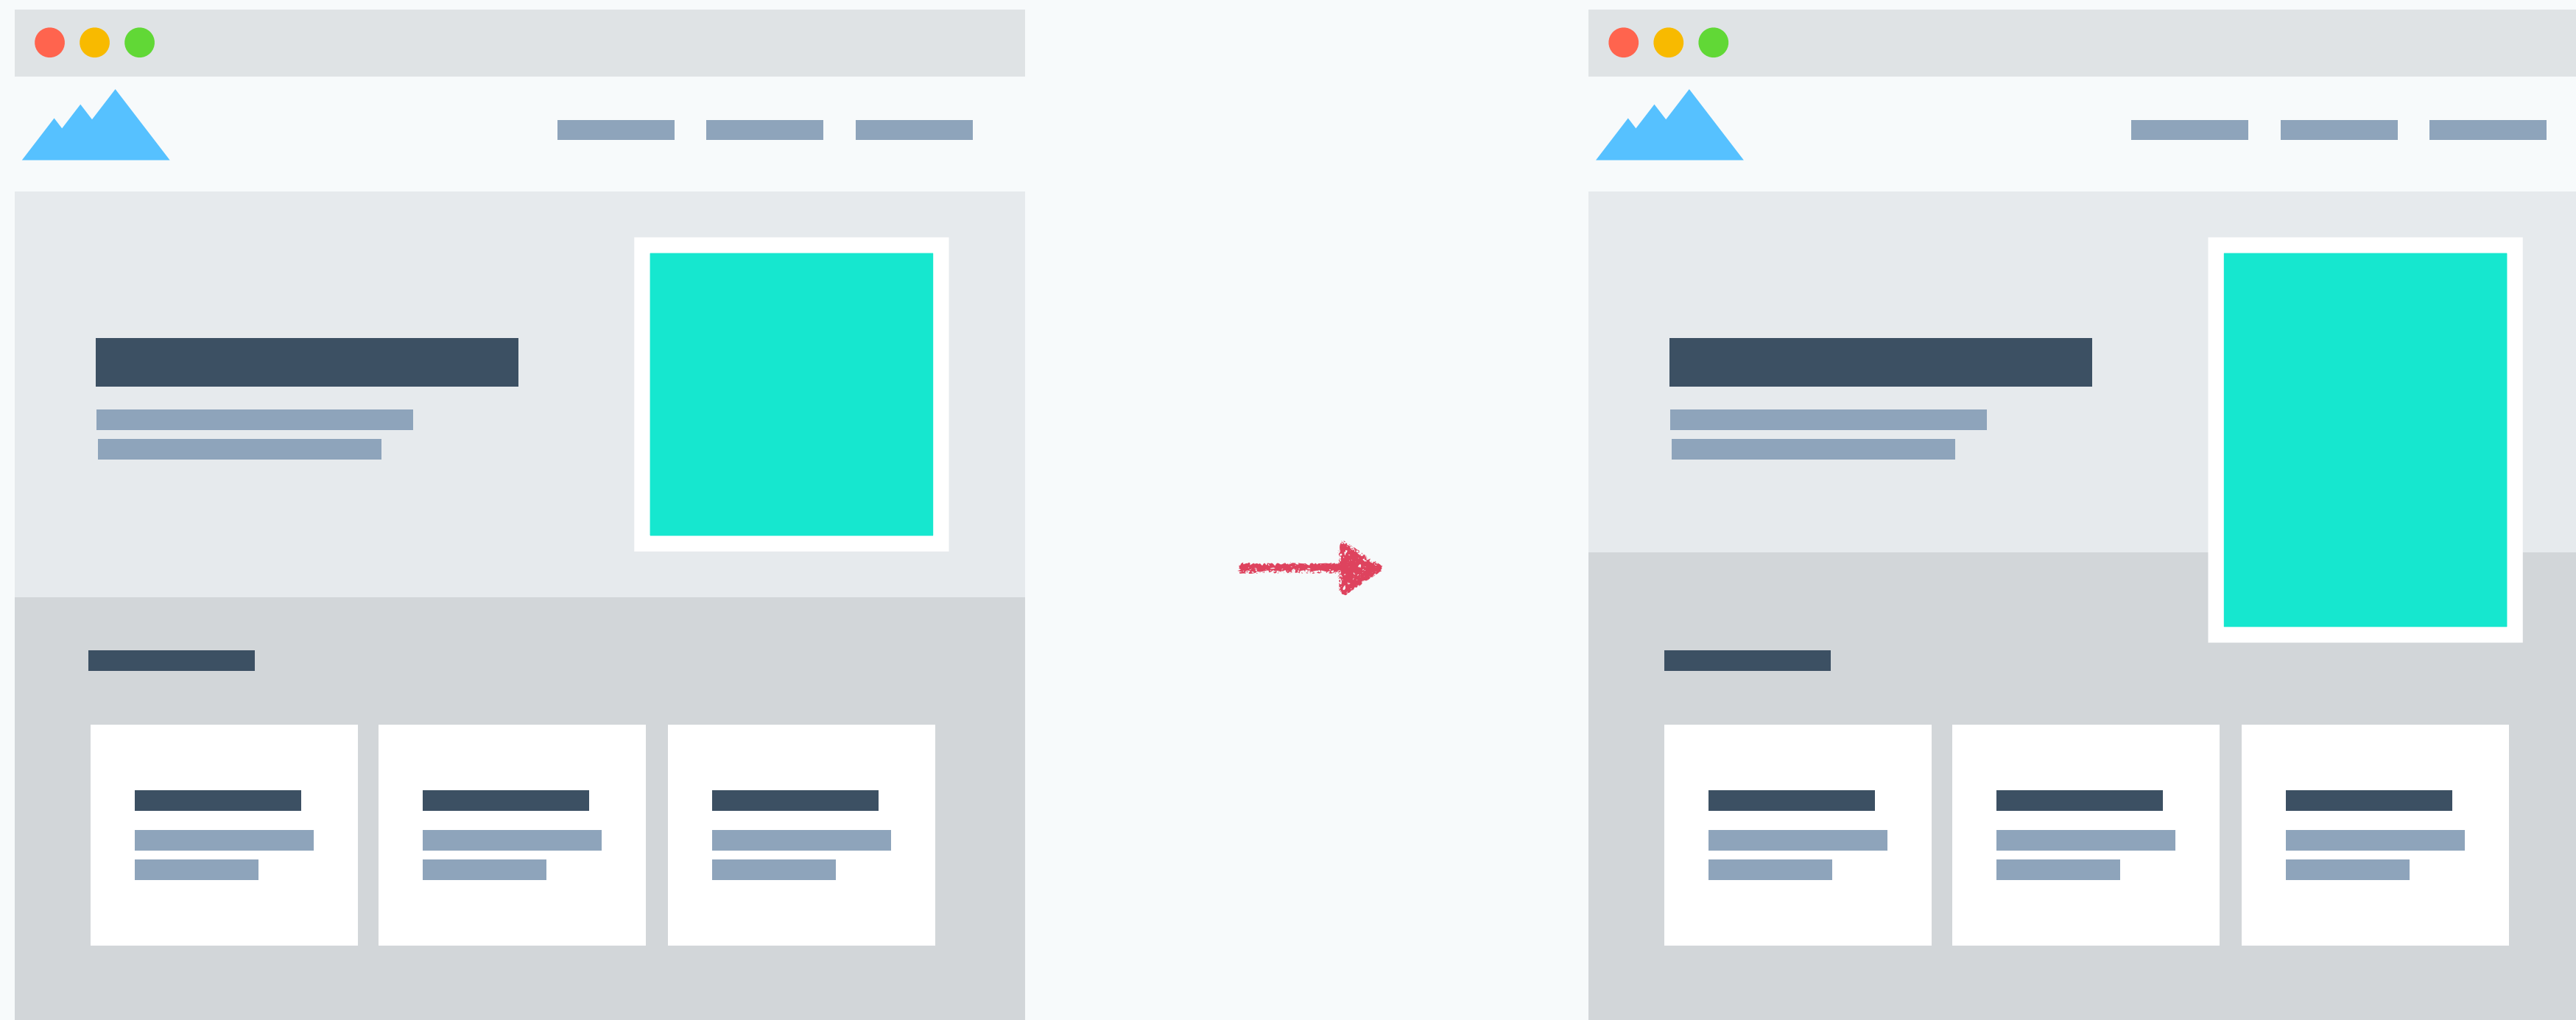

Use non-straight edge borders

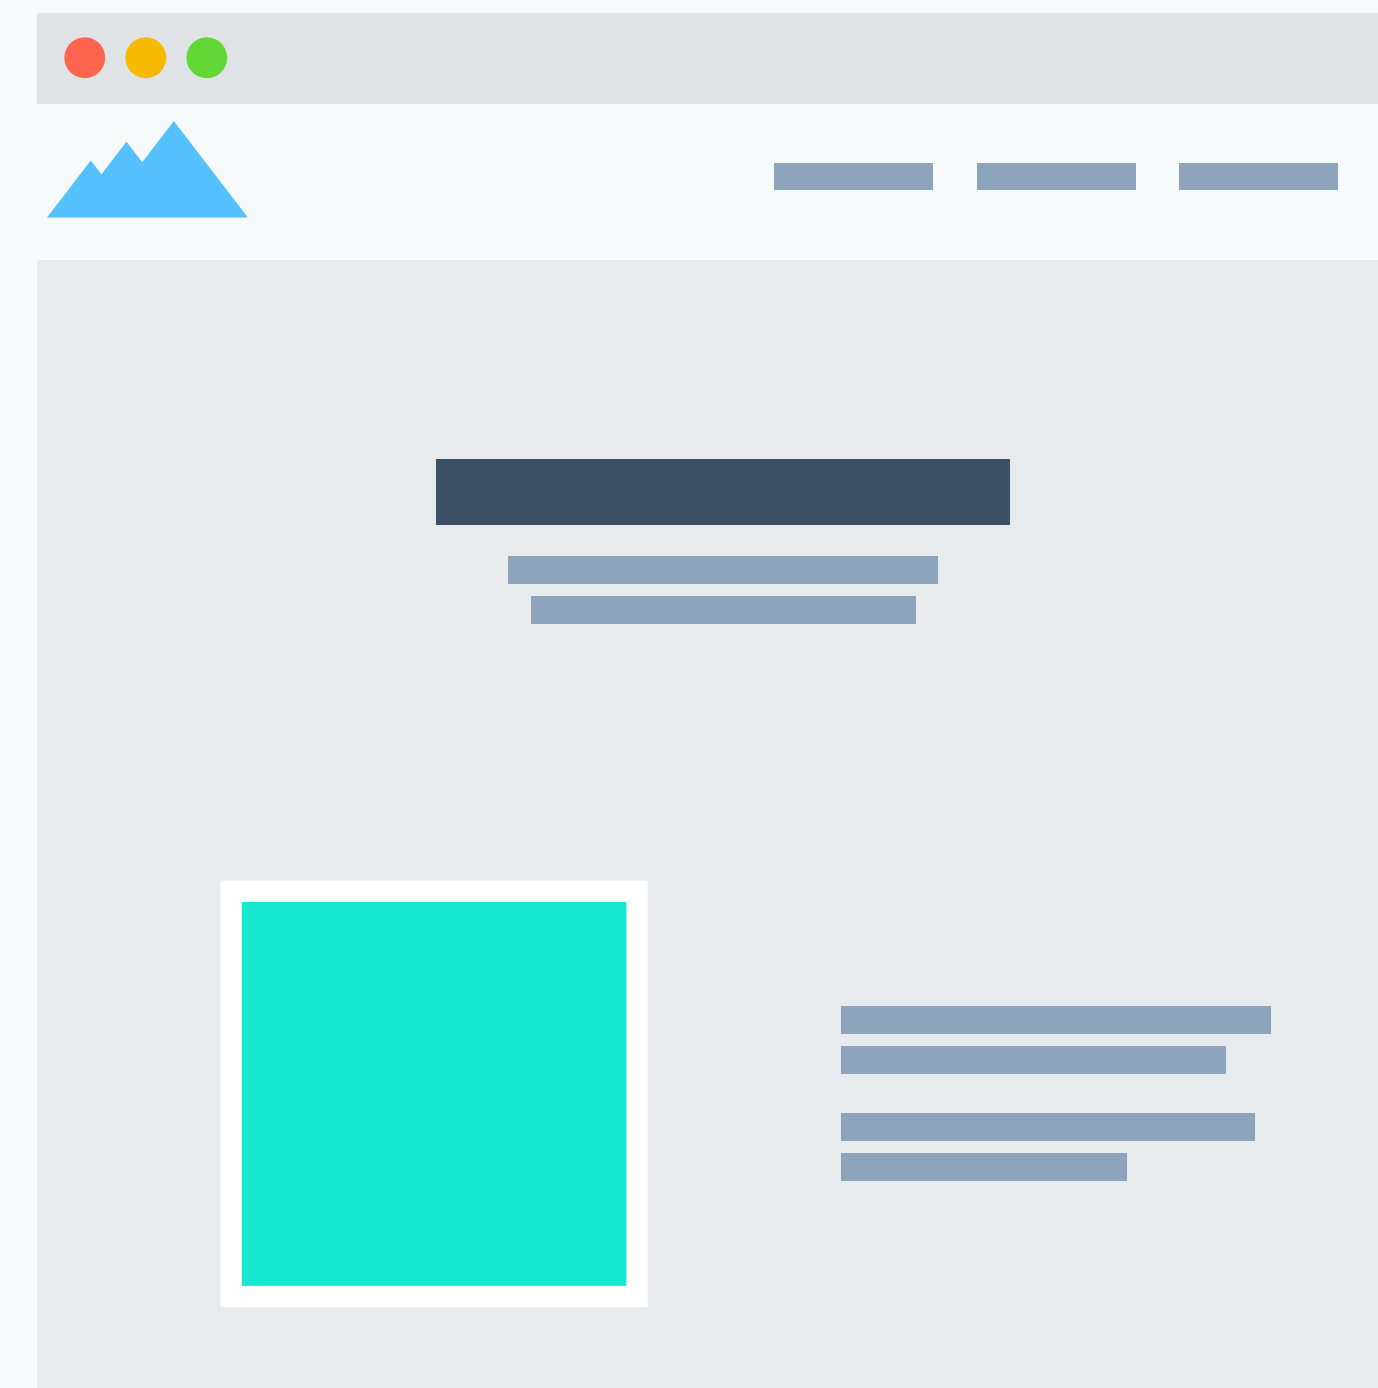

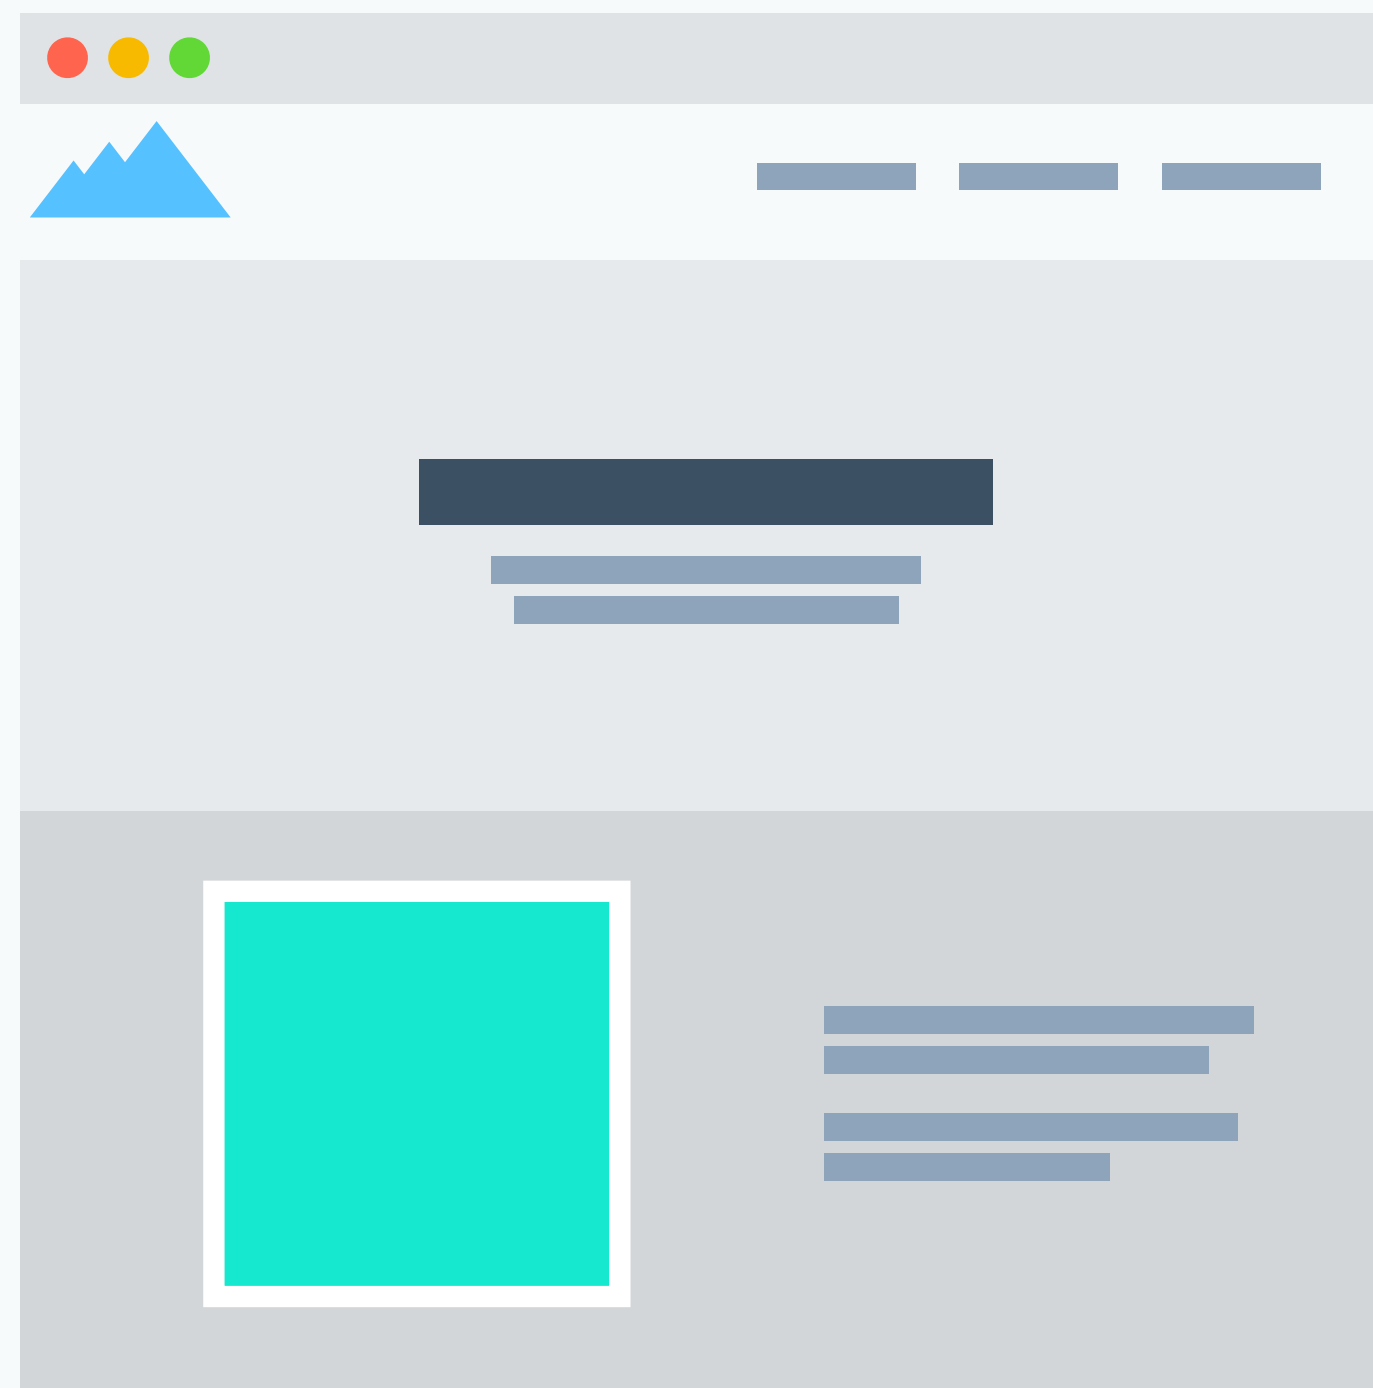

Use non-straight edge borders

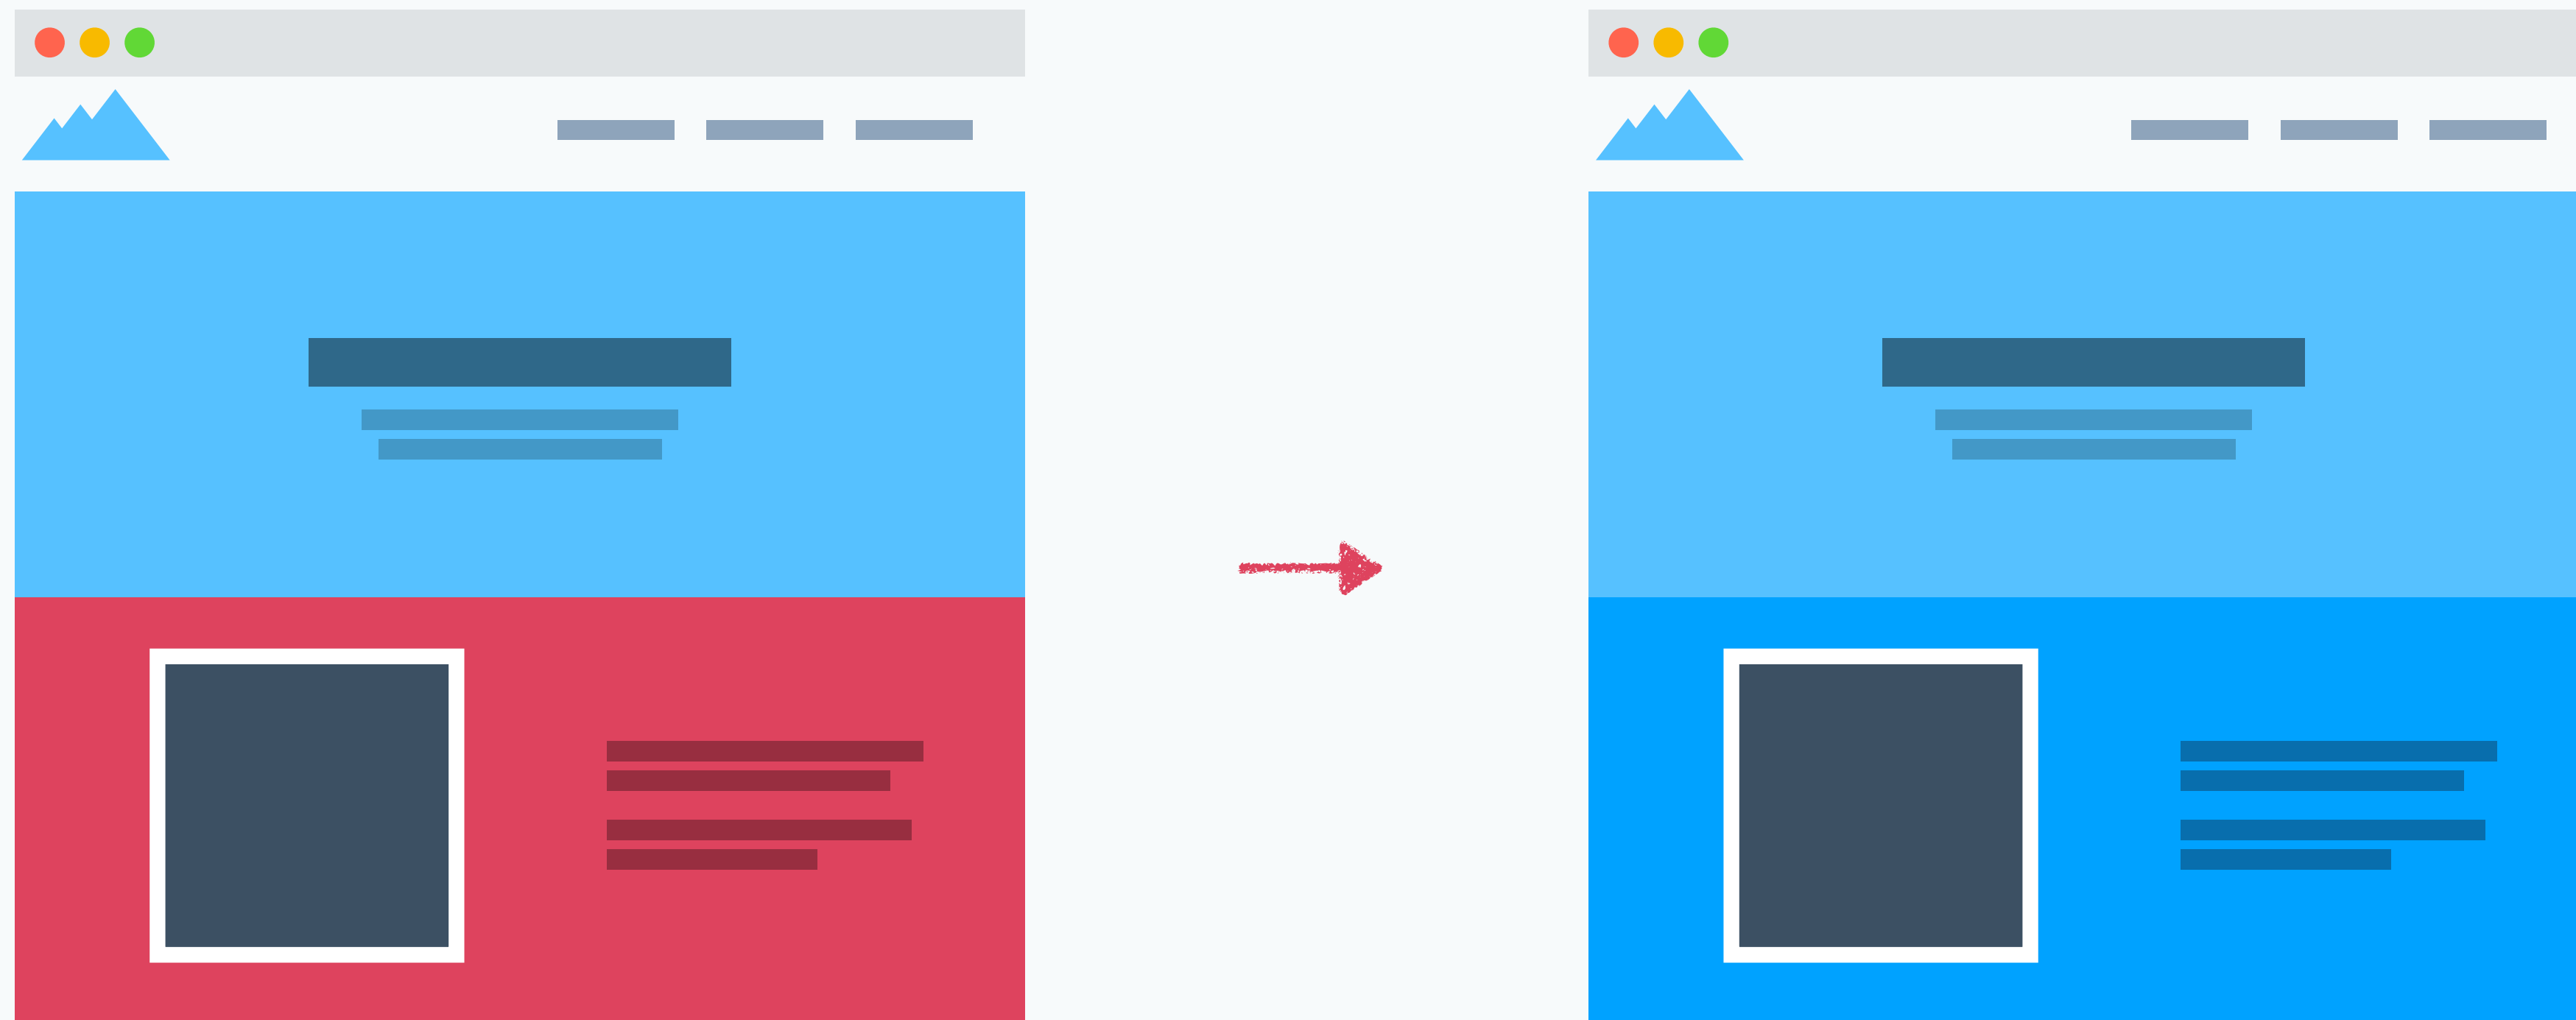

Overlap images or content blocks

Take out backgrounds completely

**Use different shades or tints of the same color
next to each other**

DEVELOPERS FIRST

We believe that payments is a problem rooted in code, not finance. We obsessively seek out elegant, composable abstractions that enable robust, scalable, flexible integrations. Because we eliminate needless complexity and extraneous details, you can get up and running with Stripe in just a couple of minutes.

```
1 // Require the Stripe library with a test secret key.
2 const stripe = require('stripe')(STRIPE_SECRET_KEY);
3
4 // Create a payment from a test card token.
5 const charge = await stripe.charges.create({
6   amount: 200,
7   currency: 'usd',
8   source: 'tok_mccorcard',
9   description: 'My first payment'
10 });
11
12 // Click → run to try this live code and create your first payment.
```
